Aims

The aim of this policy is to ensure best practice when using ICT for the entire school community including safe and appropriate usage, maintenance and ergonomics. The Acceptable Use Policy helps to ensure that students will benefit from learning opportunities offered by the school's digital resources in a safe and effective manner. The responsible use of internet and digital technologies, both online and offline and access is considered an integral part of teaching and learning.

When using the internet students, parents and staff are expected:

- To treat others with respect at all times.
- Not undertake any actions that may bring the school into disrepute.
- Respect the right to privacy of all other members of the school community.
- Respect copyright and acknowledge creators when using online content and resources.

The school employs a number of strategies in order to maximise learning opportunities and reduce risks associated with the Internet. These strategies are as follows:

- Filtering software and/or equivalent systems will be used in order to minimise the risk of exposure to inappropriate material.
- Uploading and downloading of non-approved software is not permitted.
- The use of personal external digital storage media in school requires school permission.
- Internet use by students, within school will always be supervised by a teacher.

The school encourages parents to become involved and aware of ICT in their child's life and within the whole school community. CWETNS requests that parents act responsibly and respectfully at all times, understanding that their conduct not only reflects on the school community, but will be a model for our students as well.

This Acceptable Use Policy applies to students who have access to and are users of the internet in Canal Way ETNS. It also applies to members of staff, volunteers, parents, carers and others who access the internet in Canal Way ETNS.

Staff will include cyber safety awareness in their planning throughout the year at all class levels. There will be a whole school focus on cyber safety and our digital footprint on Safer Internet Day annually.

All teaching staff have permission to upload school related work to the school website. The website is regularly checked by the school principal and Website Post holder to ensure that there is no content that compromises the safety, privacy, or reputation of students or staff. Students will be given the opportunity to publish projects, artwork or school work on the website. The publication of student work will be coordinated by the Website Post Holder.

The school has a twitter account '@canalwayetns'. This is used to post updates on events. Children's photographs are not posted on Twitter. The school principal and Website Post holder manage this account.

Cyberbullying

This type of bullying is increasingly common and is continuously evolving. It is bullying carried out through the use of information and communication technologies such as text, social media, e-mail, messaging, apps, gaming sites, chat-rooms and other online technologies. Being the target of inappropriate or hurtful messages is the most common form of online bullying. As cyberbullying uses technology to perpetrate bullying behaviour and does not require face to face contact, cyber-bullying can occur at any time (day or night). Many forms of bullying can be facilitated through cyber-bullying. For example, a target may be sent homophobic text messages or pictures may be posted with negative comments about a person's sexuality, appearance etc.

Access to technology means that cyberbullying can happen around the clock and the students home may not even be a safe haven from such bullying. Students are increasingly communicating in ways that are often unknown to adults and free from

supervision. The nature of these technologies means digital content can be shared and seen by a very wide audience almost instantly and is almost impossible to delete permanently. While cyberbullying often takes place at home and at night, the impact can also be felt in school.

In accordance with the Anti-Bullying Procedures for Schools, Canal Way ETNS considers that a once-off offensive or hurtful public message, image or statement on a social network site or other public forum where that message, image or statement can be viewed and/or repeated by other people will be regarded as bullying behaviour.

When using the internet students, parents and staff are expected to treat others with respect at all times. Engaging in online activities with the intention to harm, harass, or embarrass another student or member of staff is an unacceptable and absolutely prohibited behaviour, with serious consequences and sanctions for those involved.

Measures are taken by Canal Way ETNS to ensure that staff and students are aware that bullying is defined as unwanted negative behaviour, verbal, psychological or physical, conducted by an individual or group against another person (or persons) and which is repeated over time. This definition includes cyberbullying even when it happens outside of school hours. In addition the Department of Education Anti-Bullying Procedures, 2013 defines cyberbullying as “placing a once-off offensive or hurtful public message, image or statement on a social network site or another public forum where that message, image or statement can be viewed and/or repeated by other people will be regarded as bullying behaviour.”

The prevention of cyberbullying is an integral part of the anti-bullying policy of our school.
